

**Department of Energy**  
Washington, DC 20585

APR 08 1993

Mr. Davor Z. Pevec  
Pauahi Tower, Suite 2424  
1001 Bishop Street  
Honolulu, Hawaii 96813

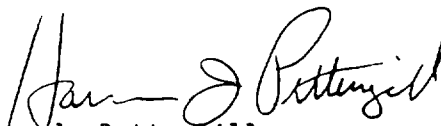

Dear Mr. Pevec:

This is in response to your February 16, 1993, letter requesting that the Department of Energy (DOE) chartered vessel, "Offshore Venture," transport fuel to Enewetak. The "Offshore Venture" was scheduled to travel to Enewetak in support of the Whole Body Counting Mission the latter part of February 1993. I have been informed by our DOE's Office of Health Liaison Specialist that in support of your request and to complete our fuel commitment, the "Offshore Venture" delivered 9,150 gallons of fuel when the vessel arrived at Enewetak the last week of February 1993.

Per your request, I have enclosed an accounting of the Enewetak Support Program expenditures for the period October 1, 1992, through January 31, 1993. Although total expenditures exceeded the support funds provided for the Enewetak Field Station, DOE will absorb this difference and not request supplemental funding.

I would like to take this opportunity to thank the Enewetak Council and all who participated in the transfer ceremony on Enewetak on February 26, 1993.

Sincerely,

  
Harry J. Pettengill  
Deputy Assistant Secretary  
for Health

Enclosure
